Java, JavaScript, C++, HTML/CSS, TypeScript	Netlify, Firebase, Express, NodeJS, React, Next.js, SQL	git, Linux, Bash Shell, Tailwind, MaterialUI, Formik, Bootstrap, VSCode

Projects

Dodge Bird [Live Demo] [Code]

- Made using Kaboom.js, inspired from Flappy Bird with different theming & difficulty levels etc.
- Game website is responsive, it can be played on any browser on any mobile/desktop device.

Recipe Box [Live Demo] [Code]

- Made using React, with React-router-dom and Splide. Used Spoonacular API for the backend.
- Includes thousands of recipes of different regions & cultures. Allows search by name & ingredients.
- Shows trending as well as curated recipes, like the vegetarian recipes section.

ReachOut [See Demo]

- Made by me and my team which participated in the HackDefine Hackathon organized by our college.
- Platform made using React, BootStrap, Firebase to help NGOs manage their work efficiently.
- Allows NGOs to recruit people using events that they share on the platform and raise awareness.

Achievements

- Ranked in the Top 5 at a hackathon conducted by Hash Define at DevFolio.
- Worldwide Rank 27 in 2022 CodeChef April Long One Contest.
- Worldwide Rank 24 in 2022 CodeChef April Long Two Contest.
